

TRUE BLUE BLUE BEACON™ G.I. MARKER

Occasionally used as a food dye, indigo carmine can be useful in GI procedures as a contrast stain to temporarily mark or highlight tissue. Blue Beacon GI marker can be diluted and introduced into the irrigation, sprayed or injected around the area of interest.

Available in a convenient luer lock 5 ml syringe, the 0.4% Indigo Carmine solution is supplied sterile, 5 syringes per box.

Visit www.mtendoscopy.com for more polypectomy solutions from Micro-Tech Endoscopy.

This solution is NOT FOR INTRAVENOUS OR INTRAMUSCULAR INJECTION. It is a single-use device indicated for temporary marking of the GI tract.
